Limbitless Solutions
Orlando, FL, 32816

Dear Limbitless Solutions,

I am writing to inquire about the position of Assistant Scholar at Limbitless Solutions for Spring 2024.

I heard about Limbitless Solutions through their presentation at Honor's Symposium and I was intrigued by their mission and the impact they have on their patients. I attended a tour of the Limbitless Lab on October 12th, and I was able to meet current interns and ask them about their experience in the program.

I believe that I would be an excellent fit for the position of Assistant Scholar at Limbitless Solutions because I can encourage interdisciplinary work, use my time management skills to work on projects in a productive efficient manner, and be an active listener in a team environment. I am studying computer science and looking into minoring in theatre, giving me a unique perspective on interdisciplinary work. I love using my computer science foundation and connecting to my creativity to be an effective problem solver. I have worked with teams in the past, for example when I led a team of high school students to design a website for the nonprofit HeadsUp, which works to get students to stop looking down at their phones and in a more HeadsUp environment to their peers. Like Limbitless, HeadsUp fostered a learning environment and allowed me to gain critical time management skills for the website development deadlines. I also worked at a busy ice cream store where I was a trainer for new hires. Going through the process of being a new employee and a trainer I have a well-rounded view of active listening and proposing solutions when problems present themselves.

I look forward to speaking with you regarding my skill set which I believe aligns with the goals of Limbitless Solution's Assistant Scholar Internship Program.

Thank you for your time and consideration.

Sincerely,
Grace Rudie
